VCD Use Only	Date Rec'd _____	Plan No. _____
--------------	------------------	----------------

The following conditions shall guide the implementation of the Venango Conservation District fee schedule:

I. Authority and Applicability

- A. Under PA Code Chapter 102 rules and regulations, and the Clean Streams Law, the Venango Conservation District is delegated the authority to administer the Commonwealth’s Erosion and Sediment Pollution Control (E&SPC) Program in Venango County.
- B. Districts may charge fees for Erosion and Sediment Pollution Control Plan reviews authorized by Act 217 - The Conservation District Law.
- C. The effective date of the Erosion and Sediment Control Plan review fee schedule is September 17, 2009 and shall apply to all plans that are submitted to the District requesting E&SPC plan adequacy except as noted.

II. Erosion and Sediment Control Plan review Fees

<u>Disturbed Acreage</u>	<u>Fee</u>
0 – 0.99	\$100
1+	\$100 per disturbed acre

Example:

0.75 acre = \$100
3.69 acre = \$369

- *Make check payable to the:* Venango Conservation District
- The District Office reserves the right to waive review fees as deemed appropriate.

III. National Pollution Discharge Elimination System (NPDES) Permits

In addition to the Erosion and Sediment Control Plan review fee, any activity that disturbs equal to or greater than one (1) acre, must also make application for an NPDES permit to release stormwater from a construction activity. Depending on the type of permit required under NPDES regulations, the following fees apply:

Administrative filing fee:

General NPDES Permit - \$500
Individual NPDES Permit - \$1500

- *Make check payable to the:* Venango Conservation District Clean Water Fund

*** Plus (see below) ***

Disturbed acre fee:

\$100 per disturbed acre, rounded to the nearest whole number

- *Make check payable to the:* Commonwealth of Pennsylvania Clean Water Fund

Note: For an NPDES application there will be three (3) checks:

1. Erosion and Sediment Control Plan review fee
2. NPDES administrative filing fee
3. NPDES disturbed acre fee

IV. Additional Policies

1. The fee schedule will apply whenever an Erosion and Sediment Pollution Control Plan is submitted for an adequacy determination or environmental review. Fees may also be assessed when the District requests plan submission due to problems perceived on site.
2. The fee will not be applicable to agricultural operations such as plowing, clearing, grubbing, and tilling, and agriculture conservation practices completed in accordance with a conservation plan developed by the Natural Resources Conservation Service.
3. When site construction and final stabilization are not completed within three (3) years from the date of initial plan approval, the District reserves the right to require the submission of a new plan and additional or upgraded controls if E&SPC standards have been revised. Fees will be charged as indicated.
4. When the design of a plan that has been submitted and reviewed is revised to a point that the previous E&SPC plan is not applicable, the District reserves the right to assess additional fees as per the fee schedule in Section II.
5. Each resubmission of a different project on the same tract of land will be charged separately according to the fee schedule, regardless of whether or not the original project received a letter of adequacy.
6. Where the owner or owner's agent fails to directly address and attempt to resolve technical deficiencies identified by the District after a review of the E & S Plan, and such negligence requires the District to conduct more than two plan reviews, a fee equal to ¼ (25%) the original cost will be imposed for each submission thereafter. Resubmission fees may be waived at the discretion of the District Manager.
