2024 SEEDLING SALE INFORMATION

NORWAY SPRUCE

This graceful pyramidal has sharp, dark green needles. Beautiful spreading branches with drooping twigs. An extremely hardy tree that is successful under most soil conditions. Fast-growing, can reach 6 feet in 6-7 years from a 3-year seedling, up to 150 feet. Makes a charming Christmas tree. An appealing ornamental specimen, or a protective windbreak. Fast growth makes the Spruce ideal for timber.

COLORADO BLUE SPRUCE

Most popular of all spruces for ornamental use. Has the largest needles of all the spruces. Stiff silvery-blue to bluish-green needles. Can reach 6 feet in 8-9 years from a 3-year seedling, up to 100 feet. Does not like wet soil. Coloring in blue spruce influenced by spacing and soil fertility.

DOUGLAS FIR

A splendid pyramidal evergreen conifer, with short-stalked flat, dark green or bluish green needles, 3/4"-1 1/4" long. Bears cones at maturity 2-4" long. A rapid grower, hardy tree that grows well in a variety of soils, but does best in deep well-drained soils. Beautiful Christmas tree, picturesque ornamental windbreak, and can be sheared a hedge.

EASTERN WHITE PINE

A majestic evergreen beauty when planted as a single specimen tree, this very hardy pine grows gracefully tall. Needles are soft and bluish-green in color. Bark is thin, smooth and greenish brown, turning darker as trees mature. With adequate moisture, growth can be 12-18" per year. Ideal for specimen planting, shade, windbreaks and appealing Christmas trees.

FRASER FIR

A beautiful mid-sized ornamental fir that is conical in shape. Needles are soft, dark green-blue in color, and usually retained well. Growth is slow, averaging only 1-2" per year. Bark is thin, smooth and grayish brown. Due to its attractiveness, durability, and scent, it is desirable as Christmas trees. Also an ideal windbreak.

RED OAK

Select strain, collected from genetically superior specimens in Northwest PA. Matures with a broad round head, leaves turning a red to reddish brown in autumn. Will tolerate a wide range of soil types from acidic to alkaline, but prefers sandy to rich loamy soil in full sun. Mature height 75-80 feet.

WHITE OAK

A tall tree reaching 6-80 feet at maturity, this hardwood tree develops a broad head. Its leaves may linger in winter. The bark of the White Oak is flaked and light gray in color.

SUGAR MAPLE

An attractive maple that can be used for dual purposes. A handsome tree for shade. Rounded head with dense green foliage having serrated 3-5 lobed leaves. The smooth silvery bark becomes darker as the tree ages. Mature trees produce sap in spring that can be used for making delicious maple syrup and sugar. Wood of these trees is hard maple, valuable for floors and furniture making. Mature height approximately 70-100 feet.

2024 SEEDLING SALE INFORMATION

RED CHOKEBERRY

A medium-sized shrub that prefers low-lying wet areas and acidic soil. It is excellent for borders or mass plantings. Bears bright white flowers in May and brilliant berries in fall that last into winter for wildlife. Exhibits bright red fall foliage.

NORTHEAST WILDFLOWER MIX

This mix includes several annual, bi-annual, and perennial flowers that are sure to brighten up any landscape. In addition, it will attract butterflies, hummingbirds, and other flower-dependent species. The planting rate is recommended at 5-10 pounds per acre, or 5 ounces per 1000 square feet. More dense cover can be achieved by heavier seeding, and when soil preparation and weed control are not possible.
