## 2025 SEEDLING SALE INFORMATION

<p><b>NORWAY SPRUCE</b> A graceful pyramidal with sharp dark green needles, beautiful spreading branches with drooping twigs. Extremely hardy in most soil conditions. Fast growing can reach 6ft in 6 -7 years up to 150 feet. Makes a charming Christmas tree, an appealing ornamental specimen or a protective windbreak. Ideal for timber.</p>		<p><b>RED OAK</b> Select strain, collected from genetically superior specimens in Northwest PA. Matures with a broad round head, leaves turning a read to reddish brown in autumn. Will tolerate a wide range of soil types, but prefers sandy to rich loamy soil in full sun. Mature height 75-80 feet.</p>	
<p><b>COLORADO BLUE SPRUCE</b> Most popular of all spruces for ornamental use. Has the largest needles of all the spruces. Stiff silvery-blue to bluish-green needles. Can reach 6 feet in 8-9 years up to 100 feet. Does not like wet soil. Coloring in blue spruce influenced by spacing and soil fertility.</p>		<p><b>WHITE OAK</b> A tall tree reaching 6-80 feet at maturity, this hardwood tree develops a broad head. Its leaves may linger in winter. The bark of the White Oak is flaked and light gray in color.</p>	
<p><b>DOUGLAS FIR</b> A splendid pyramidal evergreen conifer, with short-stalked flat, dark green or bluish green needles. Bears cones at maturity 2-4" long. A rapid grower, hardy tree that grows well in a variety of soils, but does best in dep well-drained soils. Beautiful Christmas tree, picturesque ornamental windbreak and can be sheared as a hedge.</p>		<p><b>SUGAR MAPLE</b> An attractive maple that can be used for dual purposes. A handsome tree for shade. A rounded head with dense green foliage having serrated 3-5 lobed leaves. The smooth silvery bark becomes darker as the tree ages. Mature trees produce sap in spring that can bused for making delicious maple syrup and sugar. Wood of these trees is hard maple, valuable for floors and furniture making. Mature height 70-100 feet.</p>	
<p><b>FRASER FIR</b> A beautiful mid-sized ornamental fir that is conical in shape. Needles are soft, dark green-blue in color, and usually retained well. Growth is slow, averaging only 1-2" per year. Bark is thin, smooth and gray-ish brown. Due to its attractiveness, durability and scent, it is desirable as Christmas trees. Also an ideal windbreak.</p>		<p><b>RED CHOKEBERRY</b> A medium-sized shrub that prefers low-lying wet areas and acidic soil. It is excellent for borders or mass plantings. Bears bright white flowers in May and brilliant berries in the fall that last into winter for wildlife. Exhibits bright red fall foliage.</p>	
<p><b>EASTERN WHITE PINE</b> A majestic evergreen beauty when planted as a single specimen tree, this very hardy pine grows gracefully tall. Needles are soft and bluish-green in color. Bark is thin, smooth and greenish brown, turning darker as trees mature. With adequate moisture, growth can be 12-18" per year. Ideal for specimen planting, shade, windbreaks and appealing Christmas trees.</p>		<p><b>NORTHEAST WILDFLOWER SEED MIX</b> This mix includes several annual, bi-annual and perennial flowers that are sure to brighten up any landscape. In addition, it will attract butterflies, hummingbirds and other flower-dependent species. The planting rate is recommended at 5-10 pounds per acre, or 5 ounces per 1000 square feet. More dense cover can be achieved by heavier seeding, and when soil preparation and weed control are not possible.</p>
