

AGENDA

Backyard Conservation Workshop

Venango Conservation District

Saturday, April 26, 2025

SESSION #1

9:00am - 9:20am

Using Rain Barrels for Stormwater Management, Building 1

Learn how to manage nonpoint source pollution by capturing rainwater in a barrel. Discover how you can use this FREE water for various uses around your home!

9:20am - 10:00am

Rain Barrel Construction, Building 3

If you purchased a rain barrel and would like assistance with fixing the parts to the barrel, join us in building 3!

SESSION #2

Stations will be offered according to the schedule below. Each station will be offered 3 times. Please see the attached map to view station locations.

10:30am - 11:15am

Station #1

11:15am - 11:30am

Break

11:30am - 12:15pm

Station #2

12:15pm - 12:30pm

Break

12:30pm - 1:15pm

Station #3

Tour the Mobile Environmental Display trailer!

Below are descriptions of the stations and their locations.

Invasive Species Management

Ty Ryen, DCNR Service Forester

Location: Building 1 Conference Room

During this session, Ty will give an overview of common invasive species and the common techniques for removal.

Wildlife in your Watershed

Bailey Kozalla, Venango Conservation District

Location: Building 2 Garage

Join Bailey to discover some common backyard wildlife species. Learn how to identify animals using fur pelts and skull & track replicas. Create your own wildlife track to take home!

Discover Stream Life

Jane Burkett, Venango Conservation District

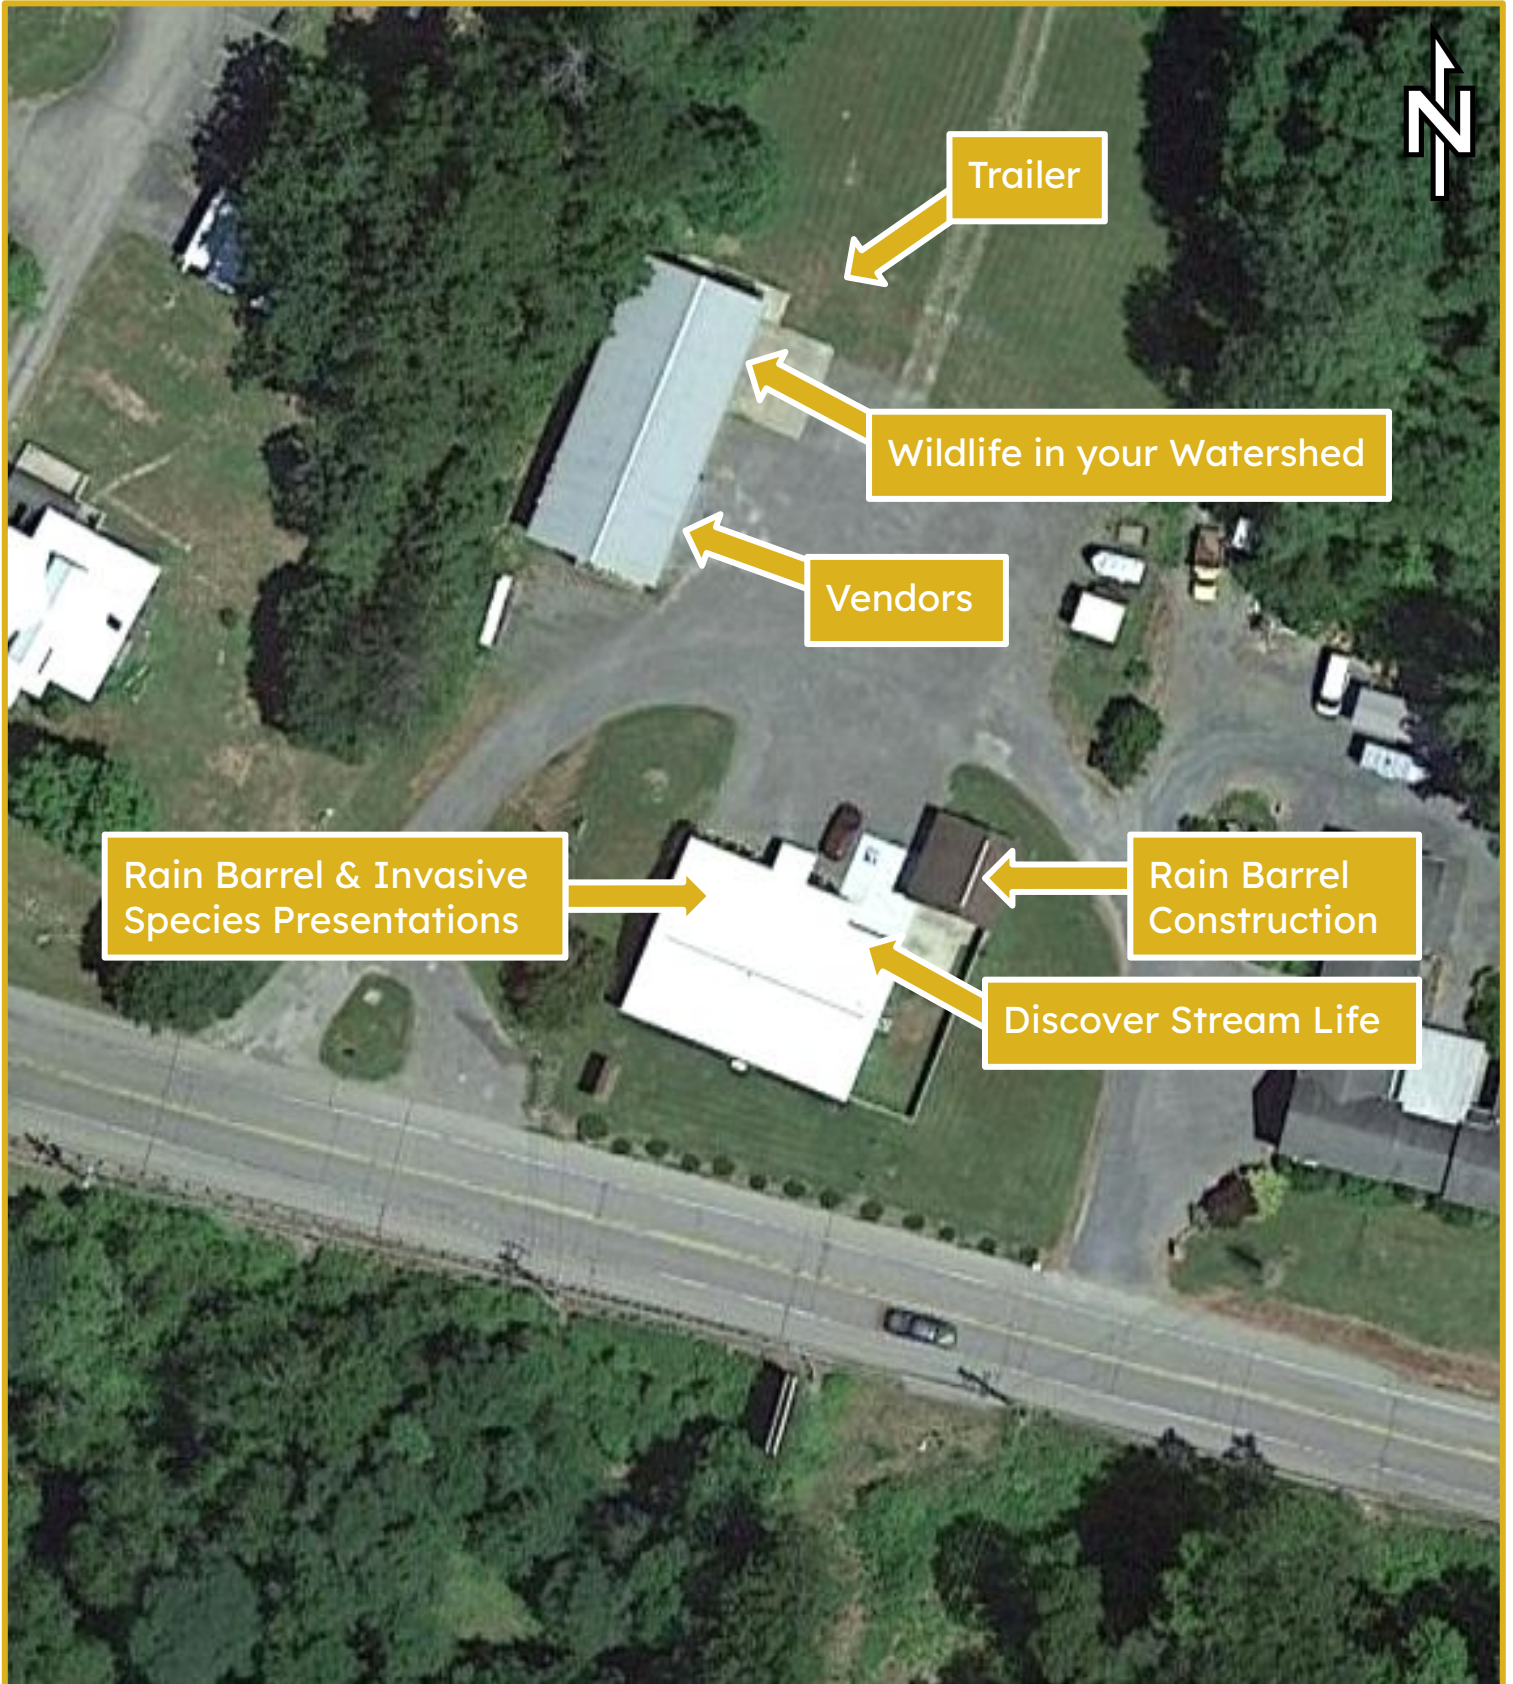

Location: Building 1 Garage

Using our new macroinvertebrate discovery tanks, discover the small critters that live in our local streams! Learn how aquatic macroinvertebrates can help us determine water quality.

During the breaks between stations, we encourage you to tour the Mobile Environmental Display trailer, our pollinator garden, and/or browse our vendor tables in building 2.
